## **PRESS RELEASE**

### **IntelliServ Places Orders for Six Additional Sway Control Systems**

August 31, 2006

**Independence, OH – May 28** – Avtron Manufacturing recently obtained orders for six additional sway control systems for IntelliServ in Provo, Utah. IntelliServ is a specialty manufacturer of pipe for the oil drilling industry. IntelliServ brings raw pipe into its facility where it performs several different machining processes. Overhead cranes are used to move the pipes from machine to machine. Throughput of the plant is heavily dependent on the time it takes to move the materials from each machine.

In January of this year, Avtron Manufacturing completed the installation and start-up of the first sway control system on IntelliServ's main overhead crane. This crane serviced a newly finished machine area that is part of the plants overall expansion. Both sway control and semi-automation were put into place to optimize operation of the crane. This phase of the project provided IntelliServ with an increase in crane throughput of over 20%. With this phase completed, IntelliServ is now installing anti-sway systems on the six remaining cranes used to mover material to and from the machine floor, in receiving and for shipping. All future crane purchases will also incorporate the Avtron Sway control package.

#### About Avtron Manufacturing Inc.

Avtron Manufacturing delivers drive systems, automation solutions and diagnostic software designed to help users reduce costs, increase efficiency and enhance profitability. With drive system solutions and services catering to virtually every material handling need, Avtron Manufacturing provides a diverse array of capabilities including ac and dc drives, encoders, standard and custom packages. Headquartered in Independence Ohio, Avtron Manufacturing, Inc. provides solutions for the global market.
